Hardware

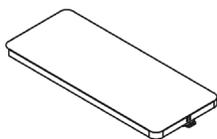

A		M6 10mm	16 pcs
B		M6 12mm	8 pcs
C		M6 12mm	24 pcs
D		M6 20mm	4 pcs
E		M6 30mm	2 pcs
F		M6 65mm	8 pcs
G		M4 10mm	8 pcs

Tools

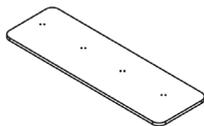

(included) Allen Key 4 & 5mm **2 pcs**

(not-included) Phillips Head **1 pc**

Main Parts

H
Base Shelf
1 pc

I
Middle Shelf
1 pc

J
Upright Post
2 pcs

K
Shelf Support Bar
1 pc

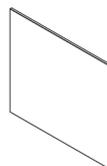

L
Top Bar
1 pc

M
Whiteboard Support Bar
2 pcs

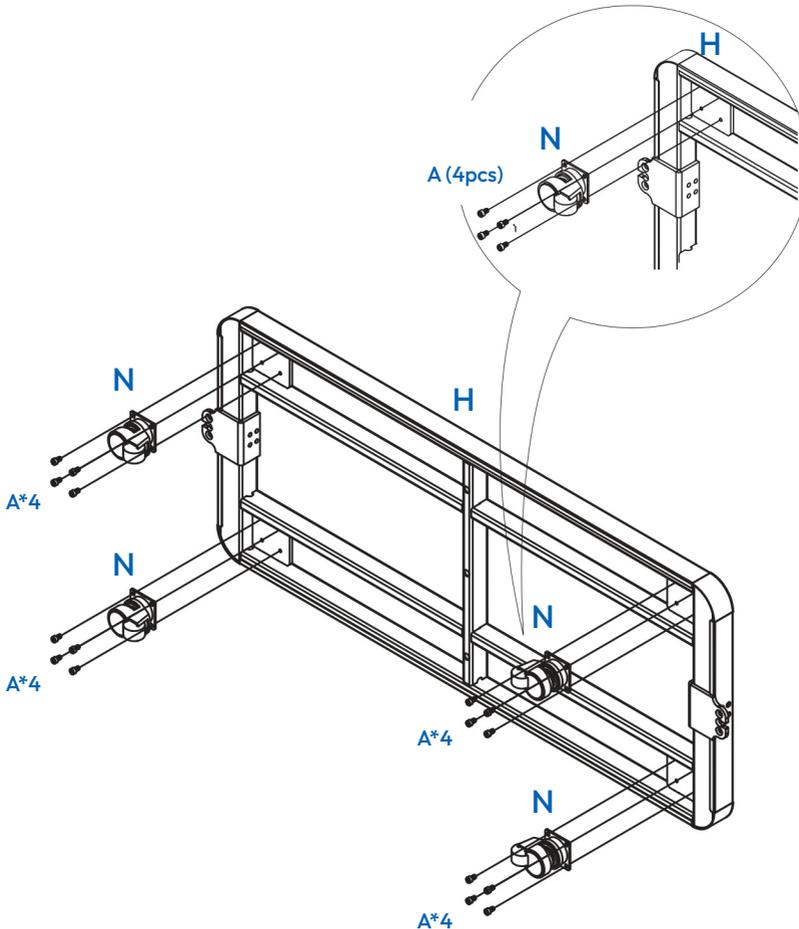

N
Footings
4 pcs

O
Whiteboard
2 pcs

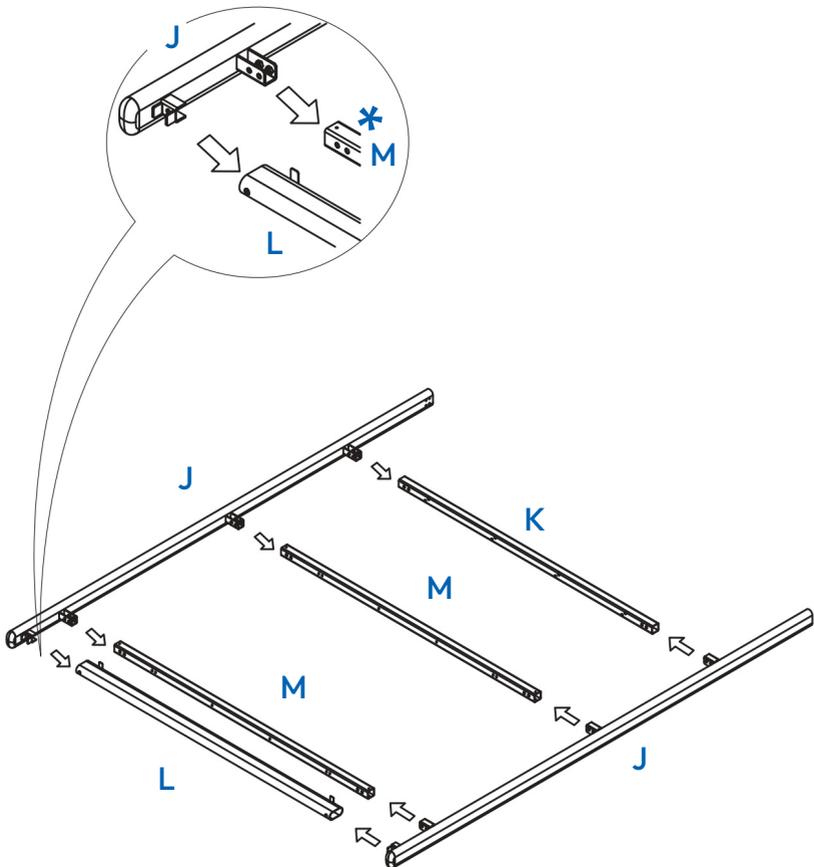

1

Let's start with the base. Grab the Base Shelf (H), four Footings (N), and all (A) screws. Hold the Base Shelf (H) on its side and align the four holes on each Footing (N) with the plate on the underside of the Base Shelf (H). Insert (A) screws and tighten firmly. Repeat for the remaining three Footings (N).

2

Now, let's build the frame. Grab the two Upright Posts (J) and lay them on their sides. Make sure the support points mirror each other—the lower end of each post has a larger gap between the support point and the end. Align the Top Bar (L), Shelf Support Bar (K), and Whiteboard Support Bars (M)* with both Upright Posts (J), then insert them together, pressing each end fully into place.

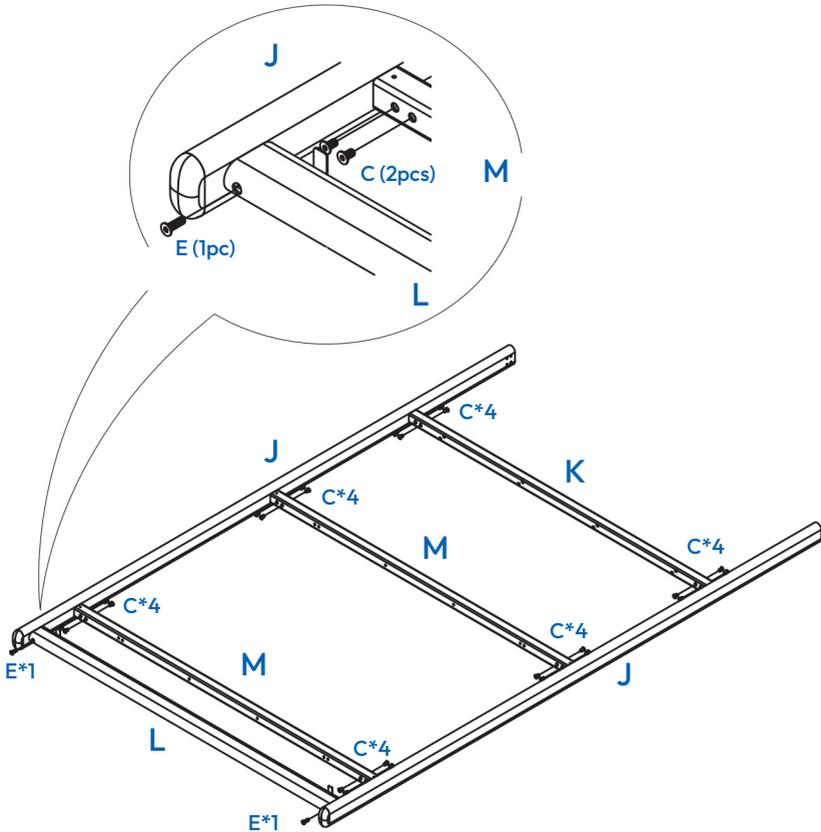

*Note: how to tell the difference between M and K?

The Whiteboard Support Bar (M) has two extra small holes on its side, while the Shelf Support Bar (K) does not.

3

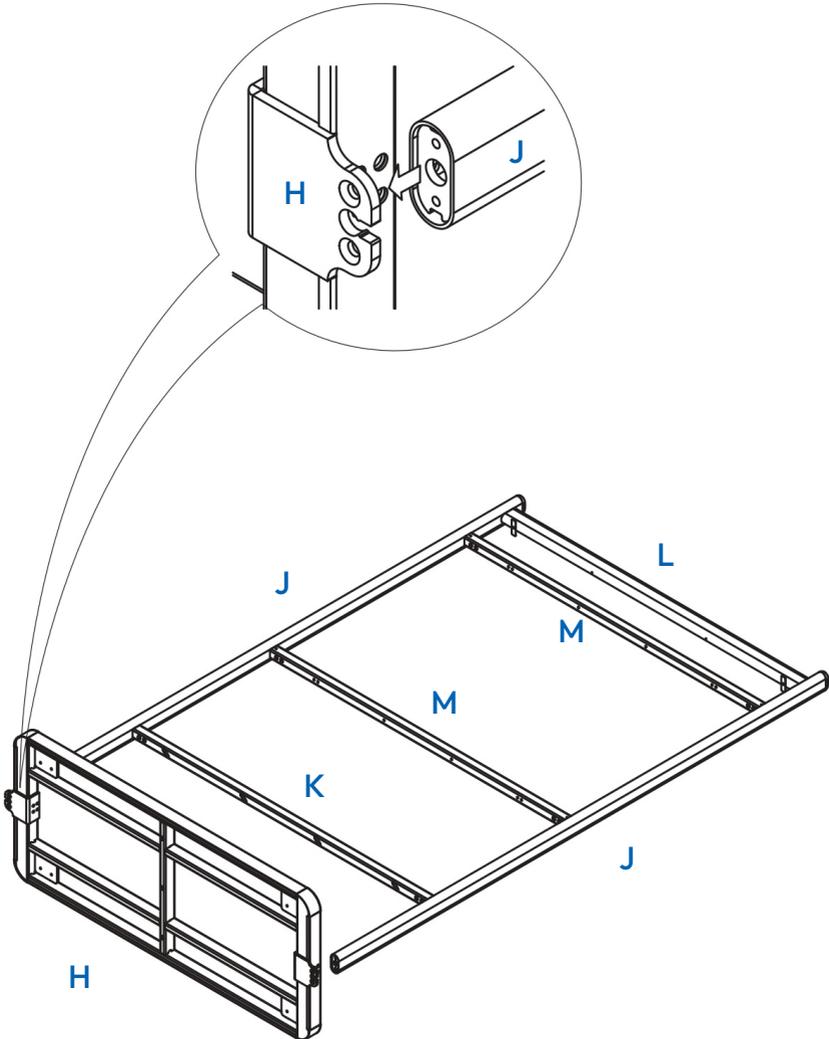

Once all the bars are seated evenly on the ground, begin fastening them together. For the Top Bar (L), insert (E) screws to secure—each side requires one (E) screw.

For the Shelf Support Bar (K) and Whiteboard Support Bars (M), use (C) screws both above and below on each side and tighten securely. Each bar requires eight (C) screws in total.

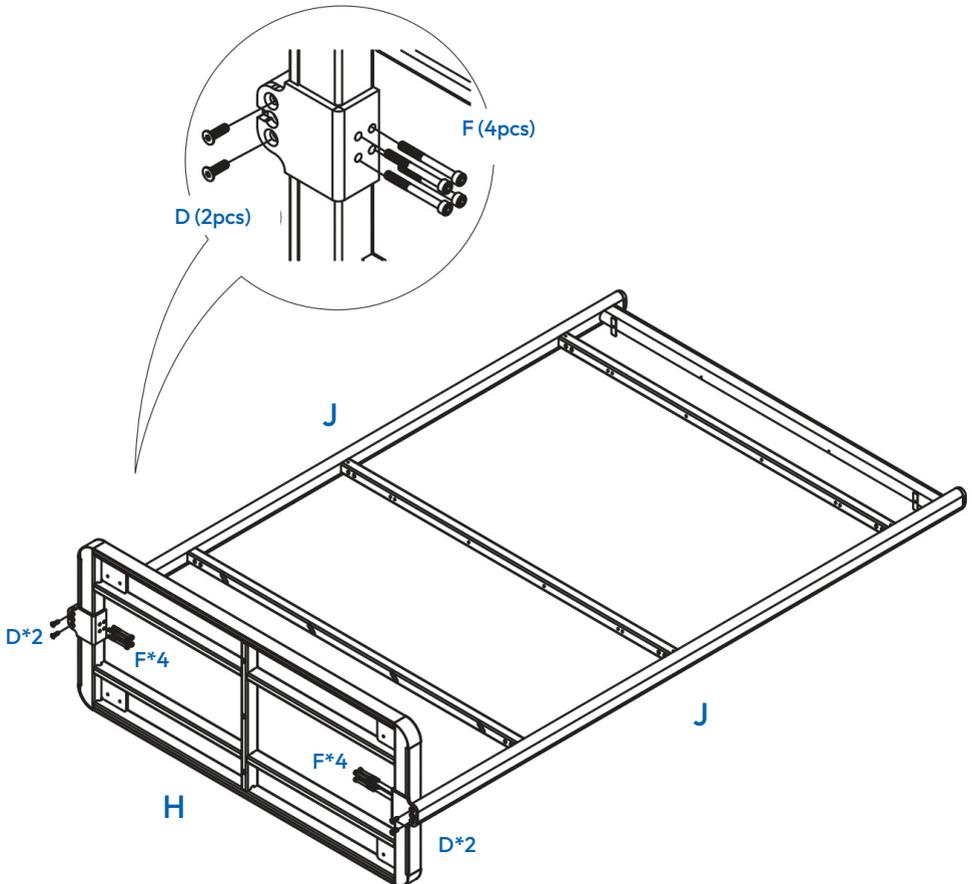

4

Bring the Base Shelf (H) back and align the assembled frame with the upright plates on the base.

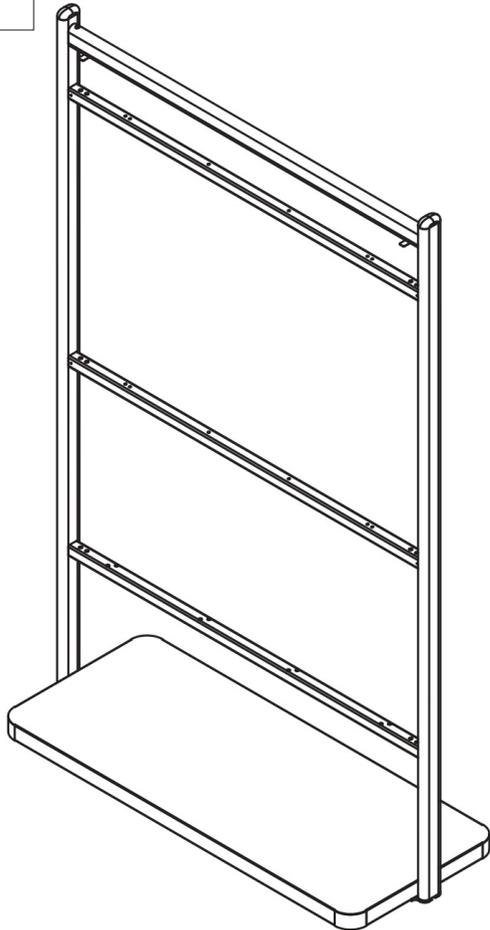

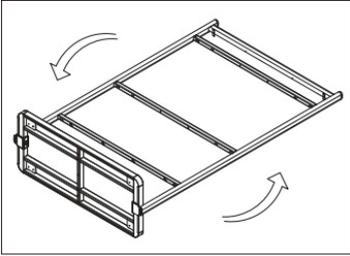

5

Once the Upright Posts (J) are aligned, insert two (D) screws into the bottom of the base plate. On the inner part of the base plate, insert and tighten four (F) screws. Repeat for the other side.

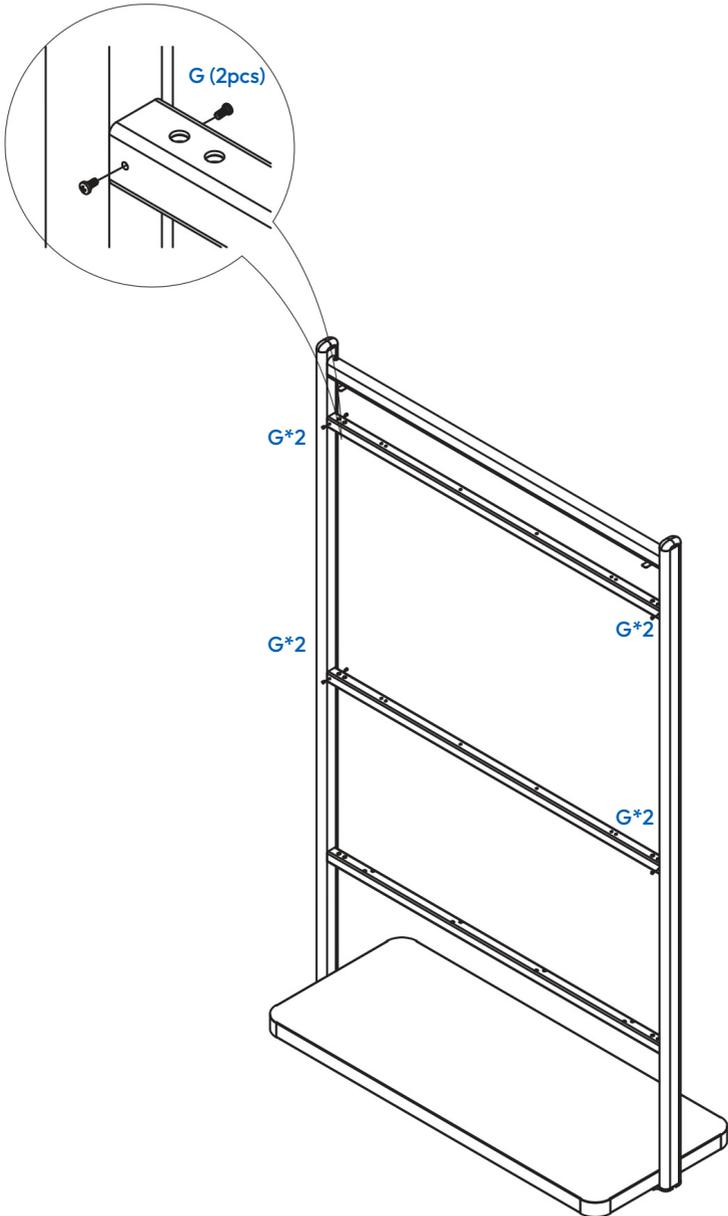

6

After the frame and base are securely attached, carefully stand the entire piece upright.

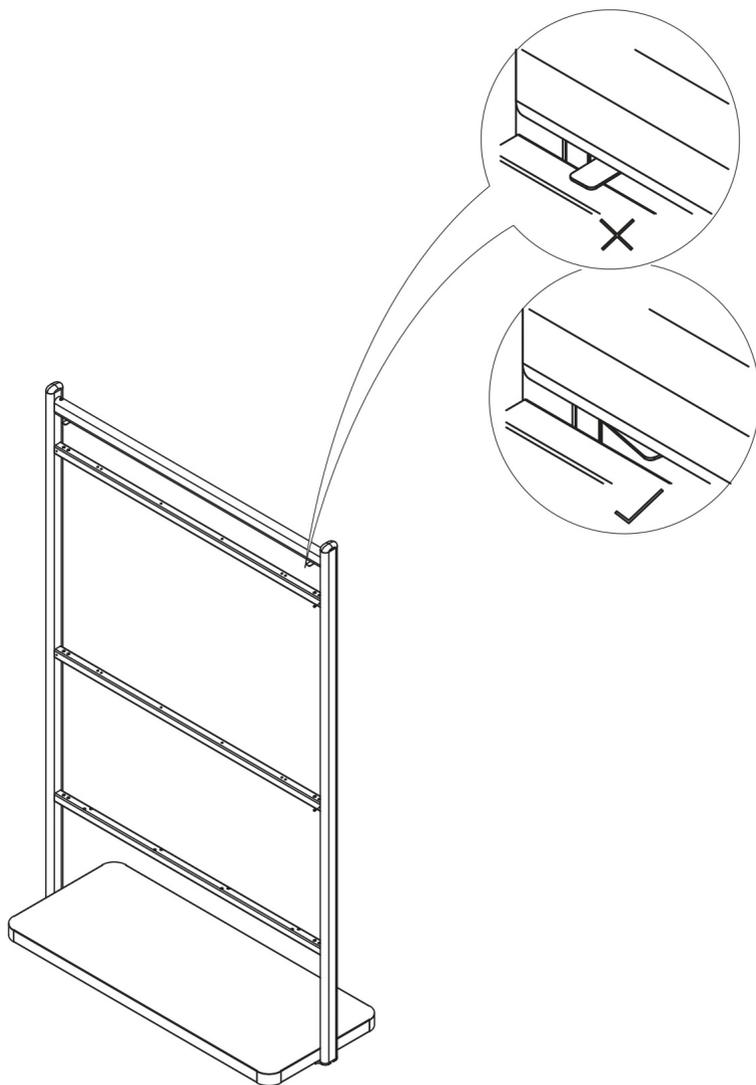

7

Insert (G) screws into the Whiteboard Support Bars (M). Each bar requires four (G) screws.

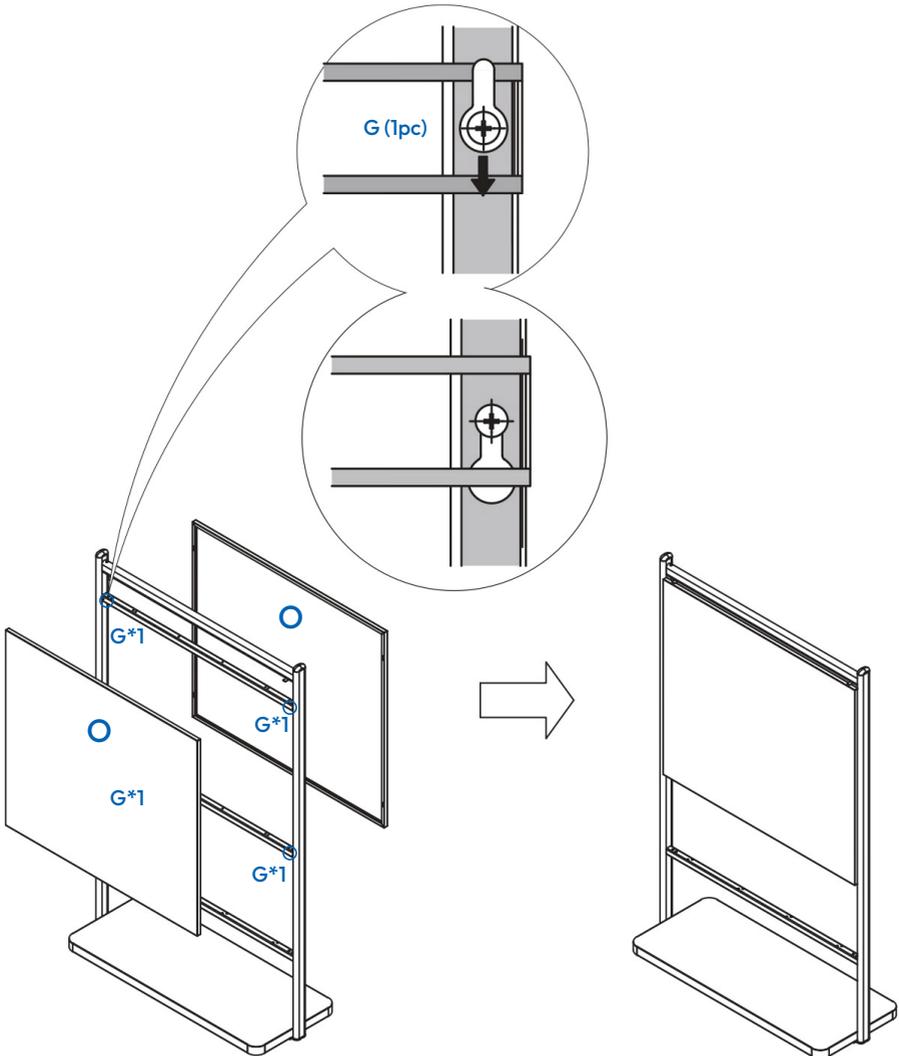

8

Before installing the Whiteboards (O), note that the small metal plates at both ends of the Top Bar (L) should be folded in—they can be rotated and stored on the inner side.

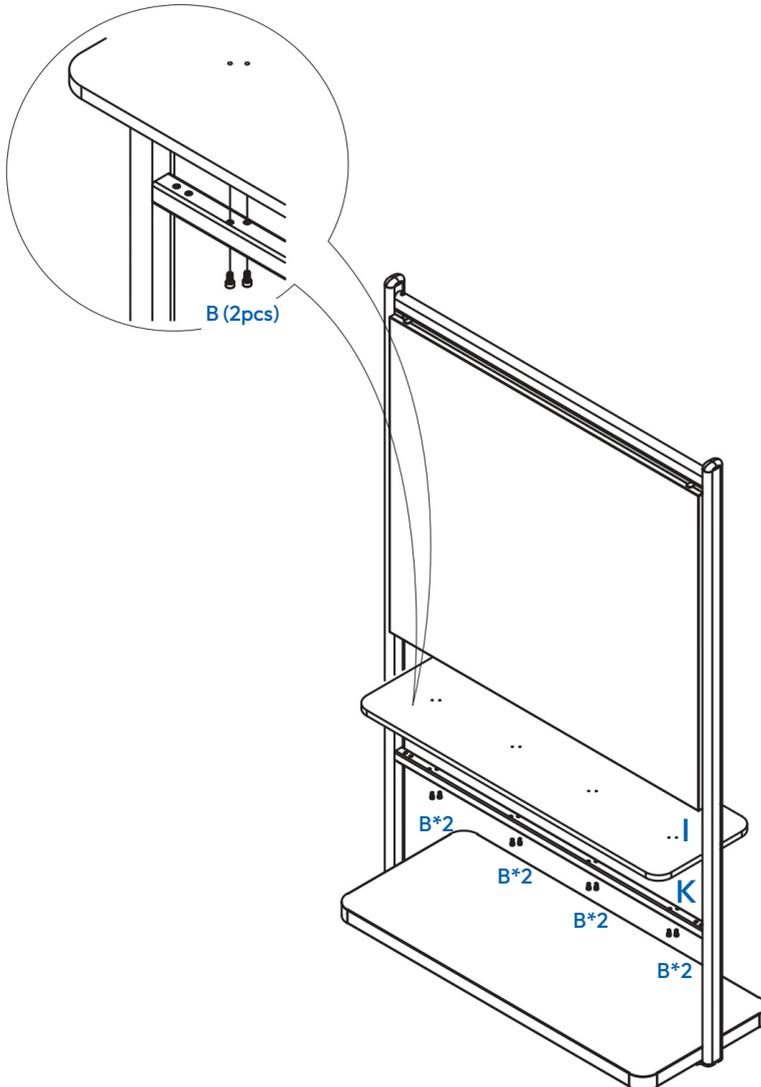

9

Take two Whiteboards (O) and check the position of the hanging holes on the inner side. Ensure that the small holes are at the top and the large holes are at the bottom. Insert the heads of the (G) screws into the large holes—four in total—and slide each Whiteboard (O) downward to lock the screw heads into the small holes.

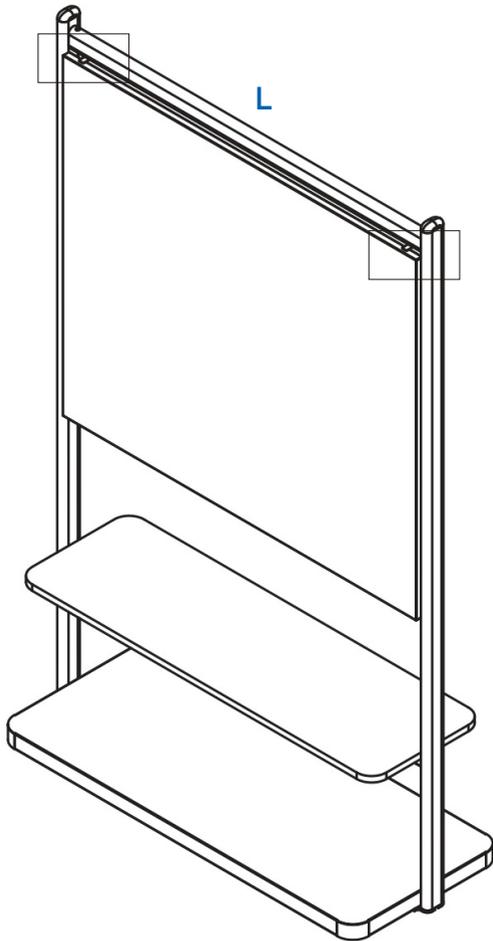

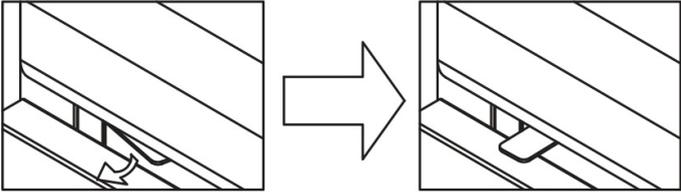

10 Begin installing the Middle Shelf (I). Place the Middle Shelf (I) on top of the Shelf Support Bar (K), aligning the holes from beneath. Insert and tighten (B) screws to secure. Use a total of eight (B) screws for the shelf.

11

Finally, fold out the small metal plates at both ends of the Top Bar (L)—they can be rotated to the outside.

All done!

Nice work—you've just elevated your workspace with Friant Plus.

Now organize, brainstorm, and let creativity flow.

Care Instruction

1. For oil stains on the particleboard shelves or powder-coated iron frame, gently wipe the surface with a soft cloth dampened with a mild detergent (such as warm soapy water).
2. Immediately dry with a clean, dry cloth after cleaning.
3. Avoid using strong chemical cleaners or abrasive tools to prevent surface damage.

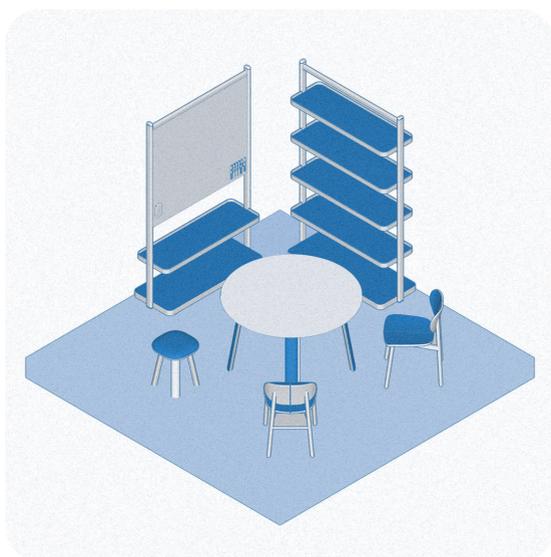

Friant has everything you need to build your entire office.

For more than 30 years, Friant has been creating high-quality office furniture to meet the needs of every workspace.

Made from the finest materials, our high-quality, durable, and stylish products are the building blocks of productivity.

Friant Plus now brings our craftsmanship online, offering exclusive access to products not found in typical retail stores.
