# 1

Let's start with the base. Grab five Casters (A), the Base (B), and the Gas Lift (C). Insert each Caster (A) firmly into the sockets on the ends of the Base (B). Place the Gas Lift (C) into the top opening of the Base (B).

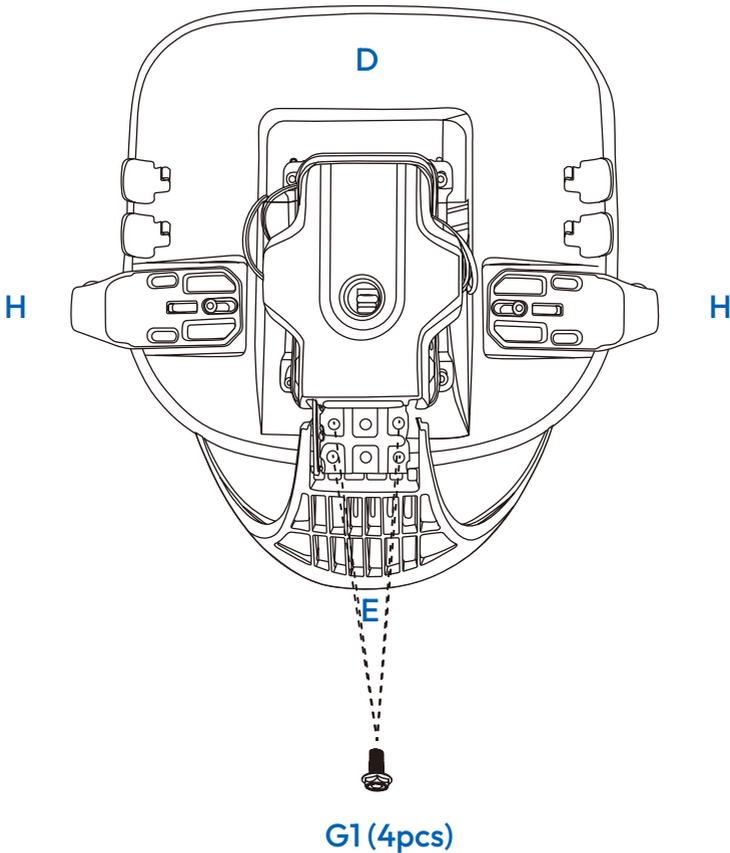

# 2

Grab the Seat (D) and two Armrests (H). Flip over the Seat (D) and Armrests (H). Align the slotted holes at the bottom of each Armrest (H) with the side holes on the Seat (D), then insert and tighten three (G) screws into each Armrest (H).

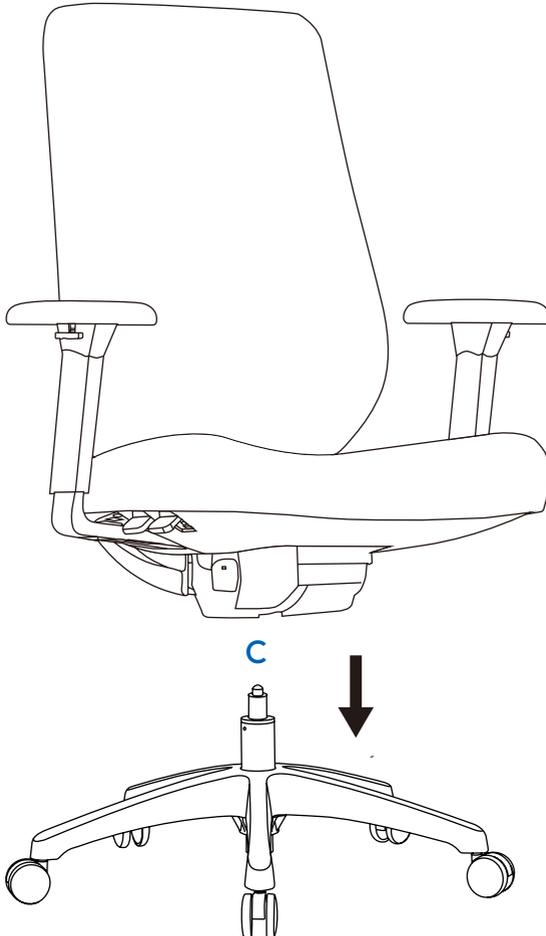

# 3

Bring the Back (E) and flip it over. Align the four holes on the back of the Seat (D) with the holes at the bottom of Back (E). Insert four (G1) screws and tighten to secure the connection.

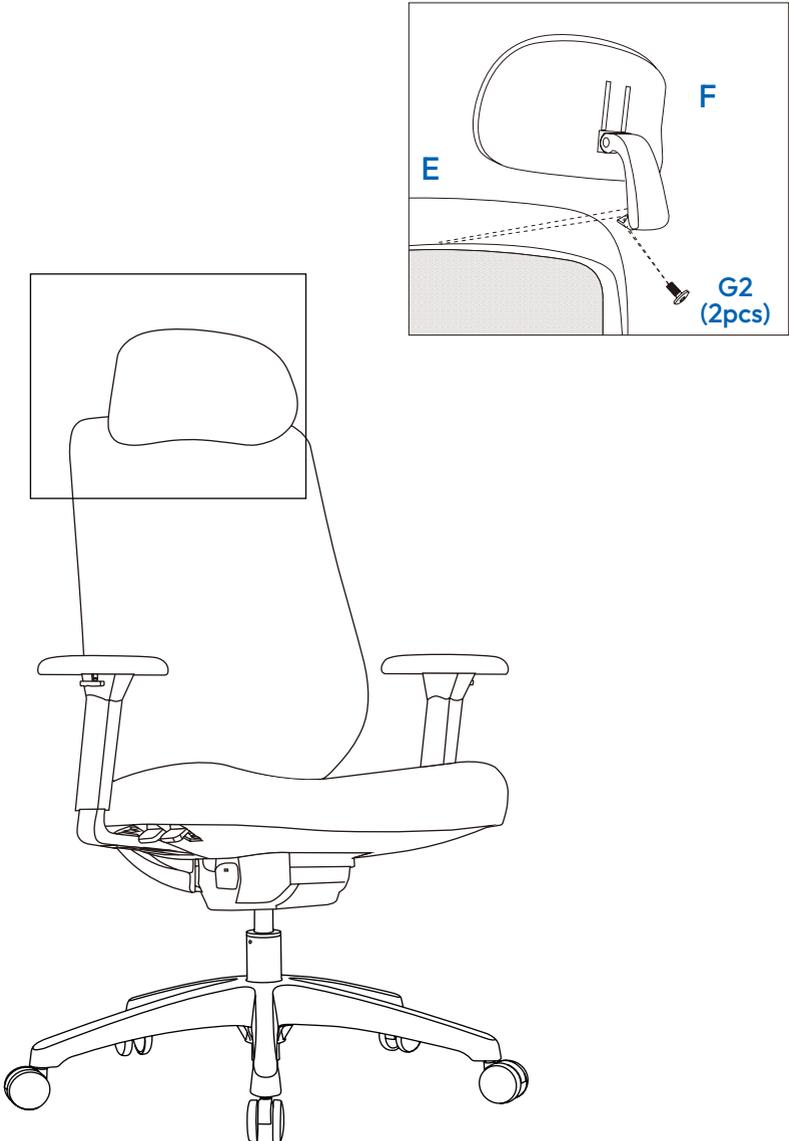

# 4

Stand the assembled Seat Unit upright. Bring the Base Unit back, align the top of the Gas Lift (C) with the center hole under the Seat Unit, and press down firmly until it locks securely into place.

# 5

Grab the Headrest (F). Clip the Headrest (F) into the middle position on the Back (E). Insert and tighten two (G2) screws to secure the Headrest (F).
